LIGHTING AND LOWERING EXPLORES NEW APPLICATIONS

ABOUT LLS

LIGHTING & LOWERING SYSTEMS IS A PART OF NORTH STAR LIGHTING INC. LIGHTING & LOWERING SYSTEMS EXPERIENCE IN LOWERING DEVICES DATES BACK TO 1967

Our engineering and marketing know how has been a major force starting with our pioneering efforts in the development of the first raising and lowering devices in High Mast system in the United States. Realizing the need for this type of maintenance, we have perfected new lighting and lowering devices for pole mount, motorized lowering systems, manual winches for indoor and wall mount applications, and lowering devices for obstruction lights. These lowering devices are made safer to operate.

Please visit our North Star Team at LightFair in Las Vegas on May 29th through June 1st. They will have a RELS-300 lowering system on display.

New Information:

LLS introduces the Cordless Drill for our Manual Crank Systems. This drill can be used with both our indoor and outdoor systems.

New and exciting applications for Lighting & Lowering Systems. LLS has always been known for our basic Residential Lowering System, RELS-300. As we are always keeping up with current trends, we find ourselves making more and more customized systems to accommodate the ever changing industry. We are seeing more complex chandeliers being lowered, requiring five plus circuits and weighing 700 plus pounds. We have introduced our Pin and Socket Connection to our existing disconnect unit. By borrowing this Pin and Socket Connection from our sister company, Camera Lowering System, we are able to accommodate more circuits. This connection also allows us to disconnect fixtures with voltage ratings up to 600v.

We are also seeing more and more existing Homes, Churches, and Court Houses retrofitting our lowering systems into their design. LLS has worked directly with project engineers to help with this retrofitting process. We have been in-

Residential applications of Lowering Systems : Easy and safe maintenance and cleaning.

involved with every stage and are happy to do so. In addition to the standard light lowering system, we have lowered speak - ers, art fixtures, gas detectors and many other non light structures. Please visit our web-site to see more: www.lightinglowering.com

AN INTRODUCTION TO OUR STAFF AT LLS

Donald Pike

National Sales Manager

Don has been with Lighting and Lowering for over eighteen years. His experience has helped develop new products and re-invent our existing products to fit in today's ever-changing industry.

Rory Utter

Customer Service/Inside Sales

Rory is our inside contact person for quotes, order entry, shipping information and general questions regarding our product. Please feel free to email her at anytime: rory@nslights.com

Mike Patel Engineer

Pat Nootens Field Technician

Victor Meza Field Technician

Our team is always available to help with technical advice or to answer any installation question you might have.

2150 PARKES DRIVE BROADVIEW, ILLINOIS 60155 1-800-229-4330
